Experience

Assistant Director of Web Design & Development
Frank Batten School of Leadership & Public Policy
March 2019 – Present

I report to the Director of Information Technology and play a critical role as lead technical developer & designer for the Director of Communications. I manage multiple web projects and create dynamic, rich experiences for users of our websites. Migrated content from Drupal 7 to Drupal 8 and successfully upgraded Drupal 8 to 9 in Acquia Cloud.

Web Developer 3
University of Virginia Advancement Communications
December 2017 –March 2019

I managed the Wordpress version of **giving.virginia.edu** and led the transition and migration to Drupal 8. Worked with vendors for VP of Advancement Communications in the development and redesign of the Advancement website.

Web Developer 3
University of Virginia Library
March 2011 – December 2017

Performed user centered design, developed and maintained various UVA Library websites (including **library.virginia.edu**), mobile applications and digital signage. I used Drupal, Wordpress, HTML5, CSS3 and JavaScript with a focus on usability and accessibility. I worked for the Communications and UX Team.

Lead Organizer and Women TechMakers Ambassador
GDG Central Virginia
January 2015 – Present

Work with ongoing support from Google to provide technical training to the UVA community on emerging Google technologies. I'm currently beta testing Google's AI product 'Bard'; competitor to OpenAI's ChatGPT.

Web Developer 2
University of Virginia Web Communications
August 2010 – March 2011

When Arts & Sciences Communications was merged with UVA Communications, I worked with the Director of Web Communications to transition 25+ Arts & Sciences websites to their team. I continued to be the Arts & Sciences lead designer and developer during the transition.

Web Developer 2
University of Virginia College & Graduate School of Arts & Sciences
March 2008 – July 2010

Managed, designed, developed and maintained the main College and Graduate School of Arts & Sciences website, Campaign for the College fundraising website and various A&S department websites. I used HTML, CSS, JavaScript, PHP and Wordpress. I practiced user experience design processes, user testing and user interface design. I built multiple email newsletter campains and a Wordpress blog for the Dean.
